

Radioactive Waste Management

- Segregate waste by physical form – solid or liquid.
- No free liquids or prohibited items (i.e. loose sharps, lead or sealed sources) in solid waste.
- Complete Radioactive Material Tag (sections A, F & G) when beginning new waste container
- Use accumulation log to track additions to the waste container – **DO NOT contaminate Waste Tag.**
- **DO NOT overfill waste containers.**
- Segregate liquid waste by half-life :
<15 days; 15 to 90 days ; >90 days.
- Dry waste does not require half-life segregation.
- **SEAL waste container prior to requisitioning** and start NEW waste container.
